HOUSE

Thousands of American women n our homes are daily sacrificing

their lives to duty.

In order to keep the home neat and pretty, the children well dressed and tidy, women overdo. A female weakness or displacement is often brought on and they well as often brought on an and they well as often brought on an and they well as often brought on the second of the brought brought on and they suffer in silence, drifting along from bad to worse, knowing well that they ought to have help to overcome the pains and aches which daily make life a burden. It is to these faithful women that

WAY TO CLEAN UP

SYSTEM AN IMPROVEMENT ON ANNUAL OVERTURNING.

Instructor in Domestic Science Points Out Proper Method of Getting Rid of Dirt and Preserving Health.

It is a unique experience and one worth chronicling to visit a large class in a prominent college for womwhere not mathematical logarithms or Greek meters but principles of household management are considered, says the New York Tribune. "And out of such an experience," says the instructor, come points deserving to be widespread.

Thorough cleaning of a room does not mean a semi-annual cleaning. As clever woman said: 'House cleaning? Don't!' There are certain things which need to be done annually or semi-annually, such as painting, whitening of walls, cleaning stoves, but with the modern house it is more sanitary and more economical to keep clean all the time than to try to do it twice a year.

"Following the regular sequence of processes is the most effective way to clean. If the mistress knows this sequence she can instruct the maid. First, collect your materials-dusters, mops, brooms. Next, look out for the plano. Dust and clean it thoroughly with an oiled cloth-preferably kerosene, because this is cleansing, evaporates quickly, is cheap and is always at hand; but sweet oil or salad oil may be substituted. Clean the white keys with alcohol, the black keys with soap and water. Dust the case after closing the piano and cover the instrument carefully.

"Now open the windows wide, if the weather permits. Dust and cover all large, permanent articles of furniture. best dust covers are made of glazed goods-some smooth, washable stuff which may be starched. Then, in order, take down the draneries and, if possible, put them out of doors for the wind and sunshine to purify. Dust the window shades and roll them close to the top. Remove from the window, after dusting, all the easily movable furniture—tables, chairs, etc. Next dust the pictures, both glasses, frames and backs. Newspapers make excellent coverings for pictures. And, by the way, study the use of newspa pers. (Wash the picture glasses after

the sweeping is over.) "As to books: There is an admirable process expressed in four words —clap, snap, blow, wipe. As to rugs. roll them inside in; spread out, if possible, on the grass or snow, or hang out on the clothesline if there is no other place. Better still, hang them over two or three lines, as this will relieve the strain. Let your rugs have the sunshine for the sake of your health; never mind the fading. Last of all. remove the plants from the room and dust and tie up the chan delier.

"Then, while the dust is settling. go outside and do some of the work needed on rugs, draperies, plants When the dust has settled clean the walls and ceiling, and dust or sweep or wash the floor. Clean the paint and the windows at the end, after the room is cleaned. The final process is very simple. Remove all the large articles of furniture, the draper ics, etc. Fold the sweeping covers in later the child's mother came in and and put all your cleaning materials was horrified beyond words to hear into their places, in readiness for the next time of use."

What Becomes of the Coke? A teacher was explaining to her class the various ways in which gas

is obtained. "Much of the gas we use is extracted from coal," she said, "and after the gas has been taken out, the coal becomes coke. In some parts of this country gas is obtained by boring deep holes in the ground and such gas is called natural gas."

"Does the natural gas come from the fires down in the bad place?" inquired a boy eagerly. "If it does, what does Satan do with all the coke he has left?"

Suppose such a prospective oil refiner had ap ed to the Interstate Commerce Com for the rate from Chicago to East St. Louis over the Chicago & Eastern Illinois, he would have been informed that the only rate filed with the commission by this company was 6% cents from Dolton, and he would have been further informed, if indeed he did not know this already, that this rate applied throughout Chicago territory. So that whether he wished to locate his plant at Whiting, or anywhere else about Chicago, under an arrangement of long standing, and which applies to all the in-This defence of the Standard Oil Company dustrial towns in the neighborhood of Chicago, he could have his freight delivered over the Belt Line to the Chicago & Eastern Illinois at Dolton and transported to East St. Louis at a rate of 6% cents. We come back, therefore, to the conclusion of the whole matter, which is that the Standard Oll Company of Indiana was fined an amount equal to seven or eight times the value of its entire property, because its traffic department did not verify the statement of the Alton rate clerk, that the six-cent comm ity rate on oil had been properly filed with the Interstate Commerce Commission, There is no evidence, and none was introduced at the trial, that any shipper of oil from Chicago territory had been interfered with by the 18-cent rate nor that the fallure of the Alton to file its sixcent rate had resulted in any discrimination against any independent shipper,-we must take this on the word of the Commissioner of Corporations and of Judge Landis. Neither is it denied even by Mr. Smith that the "inde pendent" shipper of oil, whom he pictures as being driven out of business by this discrimination of the Alton, could have shipped all the oil he desired to ship from Whiting via Dolton over the lines of the Chicago & Eastern Illinois to East St. Louis.
